

Enviro-Dyne Industrial Services, Inc. HOLIDAY NEWSLETTER

2022

This has been an exciting year for us. We have used 2022 to bounce back from the initial shock of the pandemic, and, just like all our valued clients, have adjusted to a new and modified way of doing business. This year hasn't just been about readjusting and rebounding, we focused on honing our business processes and building our team.

We're proud to share that we have had an accident-free year, spearheaded by our Safety Coordinator, Kole Finneman. Our crews work hard to maintain a safe job-site and to look out for each other both on and off the job-site.

We look forward to ringing in 2023, and can't wait to see everyone for another season of outages. Merry Christmas and Happy New Year!

*Best wishes for the New Year!
from the entire Enviro-Dyne team!*

Our crew hard at work!

Safety Message

Located in west central Minnesota, the Enviro-Dyne main office has faced its fair share of winter weather already this season. Snowy and icy conditions always pose a challenge for any industry, but Enviro-Dyne tackles these risks by leveraging our safety training program and building a highly trained crew.

Each supervisor is trained in recognizing signs of fatigue and preventing cold-weather related injuries.

Whether our crews are working hard at the office maintaining equipment for upcoming jobs or traveling hours away to blast plugs from evaporators to get your business back to efficiency standards, all employees at Enviro-Dyne want to remind you to stay safe and have a happy New Year!

2023 Look Ahead

Schedule your outages quick! Thank you to all our clients who have already booked and locked in their dates this year. As the new year approaches, we urge our clients and potential clients who have not yet booked their outage time slots to do so soon.

The calendar is filling up, but our management team is always more than happy to work with our clients to ensure that their cleaning needs are met.

If you're interested in seeing how Enviro-Dyne can assist in maximizing your periodic shutdown cleaning plans, give us a call to arrange for a pre-shutdown Optimization Consult.

Because the person that said "one size fits all" wasn't looking to keep your costs low and your profits high!

What Do We Value?

"We really appreciate all the hard work you do, and we know it is HARD work. It makes a world of difference." - Todd (CEO) told the crew on a -15F day while everyone sat around the lunchroom table for a morning meeting.

"What sets us apart—and the reason that we get and keep customers—is by doing our work safely, and doing it well. And that's what this team does." - Jack (President) added to recap the tone that's been set all year long.

Working hard. Doing it safely. And doing it well. Those values are key as we reign in the new year.

Social Media & Industry

We've all discovered through the years that social media can be a powerful tool (not as powerful as a 20K psi hydro-blast pump), and we're looking forward to keeping our LinkedIn and website as updated as possible.

Feel free to follow us on LinkedIn or Facebook to find out how we're keeping our equipment and our training at the leading edge of the industry.
